EXPERIENCE

Puratech Solutions Consultancy Pvt LTD Oct 2021- April 2023

Role: Trainee Tester

- Conducted extensive manual testing on web and mobile applications, ensuring they met functional and non-functional requirements.
- Created detailed test cases and scenarios based on software requirements and user stories. Ensured comprehensive coverage of all functionalities.
- Identified, documented, and tracked software defects using JIRA/Mantis. Provided detailed descriptions, reproduction steps, and severity levels.
- Performed thorough regression testing to ensure that new changes did not negatively impact existing functionalities.
- Participated in test planning sessions, providing insights based on prior testing experience. Assisted in defining the scope and approach for various testing cycles.
- Worked closely with developers, product managers, and UX designers to understand requirements and provide feedback on software usability and design.

TECHNICAL SKILLS

- **Testing Skills:** Functional Testing, Regression Testing, Usability Testing, Cross-Browser Testing, Smoke & Sanity Testing.
 - **Testing Tools:** JIRA, Bugzilla, Mantis and Selenium
 - **Technical Skills:** SQL (basic queries), HTML, CSS, Core Java
 - **Documentation:** Test Plans, Test Cases, Bug Reports, Test Summaries and Test Report/Guide.
-

PROJECTS

Project 1: Destination Management Company (DMC24)

Method: Functional, Non Functional Testing & Regression Testing

Description: - DMC24 is a SaaS model designed for both inbound and outbound tour operators to provide time saving features, a quick booking and reservation system, dynamic packages, and to manage large outgoing groups with more check points and core integrated operations.

Project 2: Flipkart Website Testing

Description: - Conducted testing on an online shopping website to ensure functionality, usability, and security.

Developed test cases and executed test scripts using Selenium WebDriver. Reported and tracked defects using JIRA.
