Shubham Govind Dombale

Achievement-driven Analyst with Nearly 5 Years of Experience

PROFILE SUMMARY

- Data Aggregation & Auditing:** Excelled in data aggregation and auditing, focusing on private markets, venture capital, and private equity investments, enhancing data quality for accurate analysis and strategic decision-making.
- Financial Analysis:** Expert in crafting comprehensive company profiles, enriching financial analysis capabilities to elevate strategic decision-making processes.
- Technical Proficiency:** Skilled in SQL, PowerBI, Advanced Excel, and various Python libraries including Pandas, NumPy, SciPy, Matplotlib, Seaborn, and Scikit-learn for conducting comprehensive analyses, data visualization and predictions across various projects.
- Adaptability:** Quick to adapt to new technologies and techniques, with a strong desire to stay updated with emerging trends and advancements in the IT industry.

WORK EXPERIENCE

Magna Sign as Business Analyst

Jan 2023 - Present

Responsibilities

- Data Management:** Utilized data analytics tools to manage and analyze customer data, optimizing marketing strategies and improving customer retention rates.
- Reporting and Dashboards:** Developed detailed reports and dashboards using Power BI to support data-driven decision-making processes.
- Client Communication:** Acted as a liaison between clients and the design team, ensuring clear communication and efficient resolution of any issues.
- Financial Analysis:** Conducted financial analysis to assess project costs and profitability, providing recommendations to enhance financial performance.
- Market Research and Analysis:** Conducted market research to identify trends and opportunities within the interior design industry, providing actionable insights to guide business strategies.
- Project Coordination:** Collaborated with design teams to ensure project goals aligned with business objectives, contributing to successful project completion and client satisfaction.

Morningstar India Pvt. Ltd. as Research Associate

Jul 2021 – Jan 2023

Responsibilities:

- Led data aggregation from online sources using web scraping with BeautifulSoup.
- Monitored early-stage investments in private markets comprehensively.
- Oversaw venture capital and private equity investments.
- Created detailed company profiles for financial analysis.
- Conducted descriptive statistics and visualizations using Matplotlib and Seaborn.
- Performed statistical analysis and predictive modeling with Scikit-learn.
- Developed reports and dashboards in Power BI, aiding strategic decisions.

Achievements:

- Reduced data processing time by 40% through a new aggregation system.
- Decreased data discrepancies by 25% with enhanced quality control processes.
- Managed and cleaned datasets using Pandas, improving data quality by 30%.

WingFires Technologies as Data Analyst

Oct 2016 – April 2019

Responsibilities:

- Queried and manipulated large datasets using SQL and Pandas.
- Conducted EDA with Matplotlib and Seaborn, deriving actionable insights.
- Built predictive models with Scikit-learn to support strategic decision-making.
- Presented comprehensive insights to non-technical audiences.
- Collaborated with cross-functional teams to drive data-driven strategies.
- Ensured data accuracy and integrity for decision-making processes.

Achievements:

- Implemented data-driven strategies resulting in a 35% increase in efficiency.

PROJECTS UNDERTAKEN

Investment Patterns and Trends in Private Companies

- Objective:** Analyze investment patterns, trends, and outcomes of venture capital (VC), private equity (PE), and angel investors in private companies, identifying key factors influencing decisions and success rates.
- Dataset Fields:** Investor Type, Company Name, Industry Sector, Investment Amount, Investment Date, Company Valuation, Location, Company Stage, Exit Status.
- Tools and Libraries:** Python with Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook.
- Methodology:** Data collection, cleaning, exploratory analysis, modeling trends and success rates, visualization, and reporting.
- Conclusion:** The project provides insights into VC, PE, and angel investor strategies, aiding future investment decisions and identifying successful patterns.
