Software Engineer

Manhattan Associates

April 2021 - June 2023

Bangalore

Manhattan Active Omni (MAO), Order Life Cycle Management (OLM)

The MAO is a product from Manhattan which builds with cloud technologies whereas OLM/DOM is a Supply Chain Flexibility product from the Manhattan Associates. It is an Automotive Supply Chain Management Product that consists of various functionalities and operations such as Sourcing, Allocation, DO Create/Release, Payments, ATC, Inventory Sync and SIF.

Technical Stack: Java 8, Spring Boot, Microservices, Kibana, RMQ, GIT and SCI for MAO whereas Java 7, Core java, MySQL, Jenkins and J2EE for pre-active customers.

PROJECTS

Web portal for teacher guardian scheme Dec 2018 - April 2019: The project presents a web portal for teacher guardian scheme. This is basically a web-based application for students, faculty and academic faculty in order to obtain details of students quickly. This system is like a replacement for traditional file system and avoiding traditional paperwork. The project is classified into three modules i.e. Login Module, Teacher's module and Administrator module.

Responsibilities:

Worked on styling of UI.

Worked on the Login Module.

Also helped my team for Teacher's module.

Online Hotel Booking System Dec 2020 - Feb 2021: Online hotel booking management system is a reliable and easy to use platform. It provides a platform for booking rooms and hotel online providing 3 roles (admin, manager/employee, and user/visitor) and features like searching, booking hotels, making payments, and checking booking status according to the desired location of the user. Managing entries of bookings manually for manager/admin. As it works on angular in the front end and J2EE (spring boot with JPA) in the backend.

Responsibilities:

Developed one of the core module of project.

Also have been involved in handling admin part functionality.

Have also been involved in handling front end.

Pizza Ordering System: I played a pivotal role in developing a customer-friendly pizza ordering system. The system, enabled by the internet, connects customers and pizzerias. Customers can visit the website, explore a variety of pizzas, combos, and cuisines, make their selections, and conveniently have the items delivered to their doorstep by a dedicated delivery person.

EDUCATION

Diploma in Advanced Computing (PG-DAC), Sunbeam Pune	2020 - 2021
