SUMMARY

Results-driven **Sr. Dot Net & SSRS** Developer with 3+ years of experience at **Capgemini**, specializing **in .NET Technologies, .NET Core/MVC, Object-Oriented Design Principle, Azure DevOps, SSRS, Restful Services and Oracle/SQL development**. Proven track record in designing, developing, and maintaining robust, scalable applications. Collaborative team player with strong problem-solving skills and a commitment to staying current with industry trends. Passionate about tackling complex challenges that positively impact everyday lives. Dedicated to achieving excellence through teamwork and unwavering commitment. Experienced in system enhancements, technical support, and efficient bug resolution for assigned systems.

EXPERIENCE

Capgemini | Mumbai, Maharashtra
Associate Consultant| 08/2021- Present

Role: Sr. Dot Net & SSRS Tech Lead Developer - Aug 2021 to Till Date
Project: Adecco Group

Job Description

- The **Adecco Group** is a Swiss–French company based in Zurich, Switzerland. It is the world's second largest Human Resources provider and temporary staffing firm. **Declic** is a middle office application utilized by Adecco's temporary worker agencies in France. Proficiently handled key functionalities, including **Contract, Timesheet, Payroll, and Invoice.**

- Responsibilities encompassed end-to-end software development, from proposing solutions to clients and implementing framework designs to hands-on involvement in .Net application coding. Directly contributed to system debugging, conducted thorough code reviews, and actively participated in the development of operational procedures. Additionally, played a pivotal role in crafting SSRS reports for enhanced reporting capabilities.

Responsibilities

- Some of my key responsibility includes translate functional requirements into technical design.
- Developing **WCF Service** which are used to configure the communication channel between the client application and the WCF service.
- Developed and implemented tools and complex products/solutions while adhering to development standards, agreed schedules, product functionality, budget, quality, and cost constraints.
- Provided development support throughout the project lifecycle of complex modules and solutions.
- Participated in **code reviews**, providing constructive feedback, and ensuring adherence to coding standards.
- Actively participated in **daily stand-up meetings** and **sprint planning sessions**, ensuring efficient project execution.
- Analyze the **Azure API Database** and perform various **DDL and DML** operations.
- Managing **Azure DevOps repository**, creating **pull requests**, performing different query operations, managing, and **building pipelines, creations of new task**, etc.
- Provided technical documentation for modules in accordance with internal standards.
- Resolved **Support Tickets** and small **Bug fixes**.
- Report to and work closely with project manager in all aspects of projects delivery.
- Strong working knowledge of various technology platforms and practices on Microsoft .**Net technologies, ASP.NET CORE/MVC, WebApi, Restful Services, C#, Oracle/SQL, Azure pipelines, Azure WebApp, Azure SQL DB, Swagger, N-hibernate, Scrum, Version control, Service-oriented architecture**, and Software development best practices.

PROJECTS

GST MANAGEMENT SYSTEM

- Developed a comprehensive GST management **ASP.NET MVC Core** application, emphasizing streamlined functionality. I enriched the application with a robust feature set, enabling users to seamlessly **upload Excel files** and generate detailed reports in Excel format. To enhance scalability and security, I established a cloud infrastructure using **Azure services**. This included the creation of an **Azure Web App** dedicated to hosting the GST management application, ensuring optimal availability and performance for users.

- The application's data was efficiently handled through the implementation of an **Azure SQL Database**, where I prioritized data integrity and security within the **Azure SQL Database** environment. My role culminated in the successful deployment of the GST management application on the **Azure Web App**, presenting it as a secured portal. This project showcases my proficiency in ASP.NET development, azure services, and the ability to deliver a secure and scalable application to meet business requirements.

SKILLS

.Net Framework, ASP.NET MVC, Oracle Database, C#, SQL, SSRS, SSIS, WPF, Azure DevOps, RDL Reports, Entity Framework, Visual Studio, Version Control, WCF (Windows Communication Foundation), Azure Pipelines, Azure Web App, Azure SQL Database, Team Foundation, RDBMS, MS SQL Server, WEB API, LINQ, Lambda Expression, NHibernate, Unit Testing, Deployment.

CERTIFICATIONS

- Microsoft Azure Fundamentals - AZ 900
- Communication Strategies for Virtual Age
- Successful Presentation
- Understanding Cyber Security Essentials

EDUCATION

KJ Somaiya College of Engineering | Mumbai, Maharashtra
Bachelor of Technology in Computer Engineering | 07/2021
Achieved the degree of bachelor's in computer technology from KJ Somaiya College of Engineering with 7.8 CGPA

KJ Somaiya Polytechnic| Mumbai, Maharashtra
Diploma in Computer Engineering | 05/2018
Achieved the degree of Diploma in Computer Engineering from KJ Somaiya Polytechnic with 89.70 %

ADDITIONAL ACTIVITIES

- Achieved promotion to **Associate Consultant** with the highest performance rating. (Oct-2023)

- Engaged in a range of activities including participation in Online Coding Events, the **Hackathon Competition**, and more.

- Conducted Free Medical Eye Camps and **Organized Cataract Surgeries** in various regions across Kutch, Gujarat.
