PROJECTS

- Security Personnel Profile
  An application to manage the data of security personnel of Air India and their movement from station to station, track record, and restricted the data from user level as region, station and HO.

- Mail Billing System
  This application is to manage courier service of Air India, there are two types of services Domestic and International. Updating the rate changes and generating the bill and reports for the same.

- DMS
  A simple application to upload the document with their respective section. There are admin panel and normal user panel.

- ACM Management
  Application for leave management of pilots of Air India. And there are different level approval and mail forwarding system.

- CRM (Customer Relationship Management)
  For this particular client, this application which interact with salesman on field for punching order and integrated that with third party ERP System. And there were four types of users i.e., Admin, Salesman, Tele caller,
  Special user. And partially hosted on local host which works like a bridge between online and offline ERP (third Party).

I hereby declare that the information furnished here is true to the best of my knowledge.

Best Regards,

Shraddha Pawar.
