Programming

| Core Java | HTML | CSS |

Frameworks

| Spring boot | Hibernate | REST API | JUnit | Docker | Kubernetes |

Database

| MY SQL |

Tools

| Spring Tool Suite(STS) | VS Code | GITLAB | Postman | Log4j | JIRA |

PROJECTS

One Strategic Network

📅 07/2023 - Present   📍 Pune

Client : Verizon
Role : Developer

One strategic Network is the prime project to consolidate all the existing lines of products through a minimal number of system to achieve cost reduction and quick turn around time to service the order request.

Technologies : Spring , Spring Boot , Spring Data JPA , MySQL , RESTful Web Services , Maven

Roles And Responsibilities

- Writing controller, Services and Dao layer java classes in spring boot
- Understanding and writing use cases and translates them into functional requirement
- Implementation of POJO's, DTO's and controller to Repository level classes and interfaces for interaction between request and responses
- Development, bug fixing, issues, requirement understanding

ISIS (Infrastructure Services and Inventory System)

📅 08/2022 - 05/2023   📍 Pune

Client : Proximus
Role : Developer

It is an Infrastructure Services and Inventory System . Providing triple play services efficiently to the user. ISIS basically documents Ethernet based networks. ISIS mainly evolved to document new network and services on it . This project is to help customer to document their network connections. Its goal is to improve customer experience through reduced complexity and faster deliveries.

Roles And Responsibilities

- Accomplished in the development and maintenance of Rest APIs using Java with the Spring Boot REST Framework
- Worked on enhancements for the applications based on business requirement
- Wrote JUnit test cases for Java classes
