INTRODUCTION

Network Support Engineer with 2 years 5 months of experience in designing, implementing, and maintaining robust network infrastructures for Internet Service Providers (ISPs). Skilled in a range of networking technologies, including routing and switching, WAN/LAN technologies, and network security. Highly motivated IT professional with a strong dedication to discovering new opportunities in network engineering and network security engineering.

PROFESSIONAL EXPERIENCE

Navkar Supertech Pvt Ltd   **Bhiwandi, IN - Onsite**
Network Engineer Executive   *Jun 2022 – Present*

- Expertise in routing and switching cisco, network protocols, and service provider coordination.
- Administer and optimize routing protocols including BGP, OSPF, and EIGRP.
- Perform routine network maintenance and upgrades, ensuring minimal downtime.
- Collaborate with ISPs and service providers to ensure seamless network operations.
- Implement and manage network security measures, including IPSec, tunneling, and QoS.
- Configure VLANs, stack switches, MPLS and manage VTP modes for efficient network segmentation, installed, configured, and maintained Meraki wireless access points, ensuring optimal connectivity and performance for users.
- Configured and managed IPSec VPNs, QoS settings, and tunneling for secure data transmission.
- Analyzed and resolved issues related to SNMP ports, MAC IDs, and IP whitelisting.
- Installed, configured, and maintained FortiGate firewalls to protect the network from security threats.
- Created and implemented comprehensive security policies and access control rules to enhance network security in Fortigate Firewall.
- Work on FTTx/Broadband Network, knowledge of GPON technology (splitter, ONT, ONU, OLT), hands-on experience of IP/Routing protocol - OSPF, BGP, EIGRP.
- Understanding of IP addressing and subnetting, have knowledge on Firewall Monitoring(Sophos, Sonicwalls).
- Hands on Experience in LAN/WAN & VLAN Creation, Configuration & Management.

EDUCATION

University of Mumbai | 2019   **Mumbai, India**
Higher Secondary School – Science
Percentage: 54.40%

University of Mumbai | 2022   **Mumbai, India**
Bachelor of Science – Information Technology
Percentage: 86.73%

SKILLS

- **Networking:** Routing protocols (BGP, OSPF, EIGRP), VLAN, VTP, SNMP, LSA types, active/passive interfaces.
- **Security:** IPSec, SSL, tunneling, firewall configuration (FortiGate), and QoS.
- **Monitoring Tools:** Hands-on experience in network monitoring and performance optimization tools.
- **Troubleshooting:** Expertise in resolving L2/L3 issues, network redundancy, and failover solutions.
- **Soft Skills:** Excellent analytical, problem-solving, and communication skills.

CERTIFICATE

1   : Cisco Certified Network Associate (CCNA)

2   : Cisco Certified Network Professional (CCNP)

3   : Python Basics (Internshala)
