PROJECTS

Social Networking Profile Identification Using Machine Learning (06/2021 - 12/2021)
- In Today's online social network there have been a lot of problems like fake profiles, Online impersonation, etc. To date, no one has come up with a feasible solution to these problems.
- In this Project, I intend to give a framework with which the automatic detectionAadhar based Electronic Health Record of fake profiles can be done so that the social life of peoples become secured.
- Technologies Used- Machine Learning, Python

Aadhar based Electronic Health Record (08/2020 - 12/2020)
- The project was designed to avoid the traditional method of keeping the medical data by means of papers i.e to replace this thing in digitized way by making a common portal for all the doctors and hospitals
- Technologies Used-
- Front End - HTML, CSS
- Backend - SQL

Online Examination System (05/2018 - 07/2018)
- This System is Web Based Examination System , Where the Examination are Given Online.
- Technology Used-
- Front End - HTML,CSS
- Backend - PHP

ACHIEVEMENTS

Secured Second position in Msbte Board exam at College

Received second award for my major project on the online examination system in Diploma Final Year.

An active participant in the cultural events in College
